

Pravesh Kumar

Java Full Stack Developer

praveshkumar5502@gmail.com • linkedin.com/in/pravesh-kumar-38b1422a7 • github.com/kumar-pravesh

Professional Summary

Result-oriented Java Full Stack Developer with hands-on experience designing, developing, and deploying end-to-end web applications in production. Proficient in building RESTful APIs and robust backend systems using Spring Boot, Hibernate/JPA, and PostgreSQL, paired with dynamic frontend interfaces using ReactJS, HTML5, and CSS3. Experienced in implementing role-based access control (RBAC), database optimization, exception handling, and CORS management. Delivered multiple live projects demonstrating strong problem-solving ability, clean code practices, and effective collaboration in agile development environments.

Work Experience

Java Full Stack Development Trainee — JSpider, Hyderabad (On-site)

Jun 2025 – Present

- Hands-on training in Core Java, JDBC, Hibernate, Spring Boot, RESTful API development, ReactJS, HTML, and CSS; built and deployed full-stack mini-projects.

Backend Development Intern — Robowaves (Remote)

Oct 2025 – Dec 2025

- Designed and developed RESTful APIs using Java and Spring Boot; implemented business logic, MVC architecture, CRUD operations, and authentication/authorization mechanisms for backend application modules.
- Gained practical experience with Git version control, API testing using Postman, SQL-based database management, and Agile/sprint workflows in a collaborative development environment.

Education

Bachelor of Technology (B.Tech) — Bihar Engineering University, Patna

2022 – 2025

GPA: 8.16/10

Diploma in Computer Science Engineering — Govt. Polytechnic Munger

2019 – 2022

GPA: 8.25/10

Projects

SiviOn Global Technologies – Corporate Web Platform

[Live](#) — [Vercel Demo](#)

React.js, Node.js, Express.js, MongoDB, REST API, Vite, Vercel, Render

- Built a full-stack corporate website with dynamic service pages, career portal, blog, and portfolio management using React.js frontend and Node.js/Express backend with MongoDB; developed RESTful APIs for job applications and contact forms.
- Deployed frontend on Vercel and backend on Render; implemented an internal staff portal with authenticated content management and resolved cross-origin (CORS) issues for production.

Clinixa – Hospital Management System

[Patient Portal](#) — [Staff Portal](#)

Node.js, Express.js, PostgreSQL, RESTful API, React.js, Vite, JWT, Multer, Razorpay, Vercel, Render

- Built a full-stack hospital management system with a patient-facing portal and an internal staff portal using React.js (Vite) frontend and Node.js/Express.js backend with PostgreSQL (Aiven cloud); developed RESTful APIs for patient registration, appointment booking, prescriptions, billing, and lab test workflows with Swagger documentation.
- Implemented role-based access control (RBAC) for Admin, Doctor, Receptionist, and Lab Technician roles; integrated JWT authentication with refresh tokens, OTP-based patient registration (Nodemailer/Twilio), Razorpay payments, and file upload support (Multer); deployed on Vercel and Render with production CORS and rate-limiting configured.

Aapthi Marketing Solutions – Corporate IT & Staffing Platform

[Vercel Demo](#) — [GitHub](#)

React.js, Node.js, Express.js, PostgreSQL (Neon), REST API, Vite, Tailwind CSS v4, Framer Motion, Vercel, Render

- Developed a premium corporate platform featuring a dynamic career portal, automated inquiry system, and a high-performance frontend built with React.js and Tailwind CSS v4 for a modern, fluid user experience.
- Migrated the data layer from MySQL to Neon Postgres, refactoring the backend architecture for cloud scalability; implemented secure RESTful endpoints for lead generation and job application workflows.
- Engineered an administrative dashboard for real-time tracking of corporate inquiries and candidate resumes; deployed the full-stack system using Vercel (Frontend) and Render (Backend) with production-grade security and CORS protocols.

Go-Easy – On-Demand Vehicle Booking System

[GitHub](#)

Java, Spring Boot, Hibernate-ORM, PostgreSQL, RESTful API, Postman

- Built RESTful APIs for customer registration, vehicle availability checks, and booking confirmation; implemented fare calculation using latitude/longitude coordinates.
- Managed booking integrity with active booking flags to prevent conflicts; persisted all data using Hibernate/JPA with PostgreSQL.

Skills

- Languages:** Java, JavaScript
- Frontend:** HTML5, CSS3, ReactJS, Vite
- Backend:** Spring Boot, Spring MVC, Hibernate-ORM, Node.js, Express.js
- Databases:** SQL, PostgreSQL, MongoDB
- Tools:** Git, Maven, Postman, VS Code, Eclipse
- Architecture:** MVC, REST API Design, CRUD, JDBC, Agile/Scrum
- Security:** Authentication, Authorization, RBAC, CORS, JWT
- Deployment:** Vercel, Render, GitHub
